D-DAY®

centuri™

D-DAY

A dramatic war game featuring enemy attack on three fronts, land, sea and air

Tranquility Base

Huddled in a camouflaged beach head garrison you man your artillary The beauty of the deep blue sky before you is only surpassed by an even deeper blue ocean It's quiet but not for long

Peace, Is Not At Hand

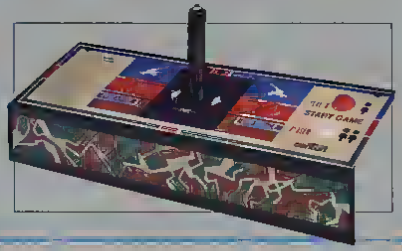
The calm is frightening Suddenly you hear a rumble to your left you look up perspiration drips down your hands loosening your grip on the joystick

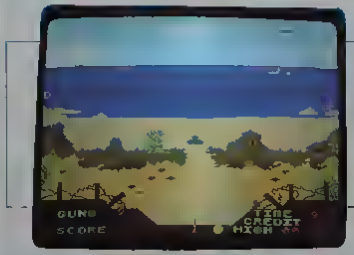
The Discovery

Your fears are well founded it's a huge bomber with you in its sights Another rumble to your right a tank is bearing down the path that leads to your garrison While cutting through the high seas a destroyer closes in, ready to release its landing craft

The Decision

Your thumb inches down on the red firing button and you blast away A bomber is downed, a tanker is stopped in its tracks and the destroyer takes on water but there's plenty more where they came from as the battle for survival continues





Always Darkest Before

Night falls but the battle rages on Now the darkness becomes the ally of the enemy Your only hope is your powerful searchlight

Aircraft Bombers	100
Bombs	
Destroyers	
Marines	
Armored Tanks	
Trucks	
Landing Craft	
If Landing Craft reaches land	
If 5 marines accumulate
